01 — Project Overview & Brief

This document provides a complete record of the UX/UI design system, structure and strategy for the New City Church Milton Keynes website redesign. It replaces the original Figma files and serves as the definitive design reference for the project.

Client Context

New City Church MK is an independent evangelical church affiliated with the Fellowship of Independent Evangelical Churches (FIEC). The congregation meets at Oakgrove School, Venturer Gate, Milton Keynes MK10 9JQ. Registered Charity No. 1187160. The redesign replaces a legacy Wix site with a custom, high-performance, mobile-first experience built for clarity and welcome.

Project Goals

- Make first-time visitors feel warmly welcomed and fully informed before they arrive on Sunday.
- Communicate service times, location, parking, dress code and children’s provision with absolute clarity.
- Provide frictionless access to sermons, news and church-life groups.
- Enable non-technical staff to publish news via a simple CMS.
- Meet modern accessibility and performance expectations (WCAG-oriented).
- Visually express the church’s warm, informal, Bible-centred culture.

02 — Moodboard & Visual Direction

The visual language balances warmth with clarity. A deep magenta accent conveys energy and approachability without appearing corporate. Soft cards, generous whitespace and authentic community photography create a digital space that feels human and inviting.

Figure 1 — Moodboard: colour system, typography cues and UI principles

Four Visual Pillars

- **Warmth** — Magenta accent, soft rounded surfaces, human photography of real church life.
- **Clarity** — Strong typographic hierarchy, short scannable copy, unambiguous calls to action.
- **Trust** — Consistent branding, high-contrast text, professional yet informal tone of voice.
- **Community** — Faces of families, children, leaders and everyday members featured throughout.

03 — Brand & Style Guide

Colour Palette

Primary #8B2F5F
Primary Dark #6E244A
Primary Light #FDF2F6
Text Main #0F172A
Text Muted #475569
Background #F8FAFC

Token	Hex	Usage
Primary	#8B2F5F	Primary CTAs, active navigation, key accents and links
Primary Dark	#6E244A	Hover / pressed states and stronger emphasis
Primary Light	#FDF2F6	Soft backgrounds, badges, icon containers
Text Main	#0F172A	Headings and primary body text
Text Muted	#475569	Secondary copy, captions and supporting text
Background	#F8FAFC	Page background and alternating section fills
Border	#E2E8F0	Card borders, dividers and subtle separators

Typography

Primary typeface: Plus Jakarta Sans (Google Fonts).
Weights in use: 300 (Light), 400 (Regular), 500 (Medium), 600 (Semi-Bold), 700 (Bold), 800 (Extra-Bold).
Headings lean on 700–800 for presence. Body copy uses 400–500 for comfortable reading.

Component Patterns

- **Buttons** — Pill-shaped or rounded rectangles, solid primary fill, white text, subtle elevation on hover.
- **Cards** — White surface, 14–28 px border-radius, soft shadow, generous internal padding.
- **Navigation** — Fixed top bar with backdrop blur; active link indicated by underline and colour shift.
- **Badges / Chips** — Soft primary-light fill, primary text, fully rounded.
- **Icons** — Phosphor Icons (web), used sparingly for location, prayer, children and similar concepts.

Spacing & Radius Tokens

Border-radius scale: 14 px (sm) · 20 px (md) · 28 px (lg). Container horizontal padding 24 px. Maximum content width ≈ 1200 px. Vertical section rhythm typically 80–140 px.

04 — Information Architecture & Sitemap

Navigation is intentionally short. The primary job of the site is to answer four questions for a newcomer: Who are you? When and where do you meet? What should I expect? How do I get involved?

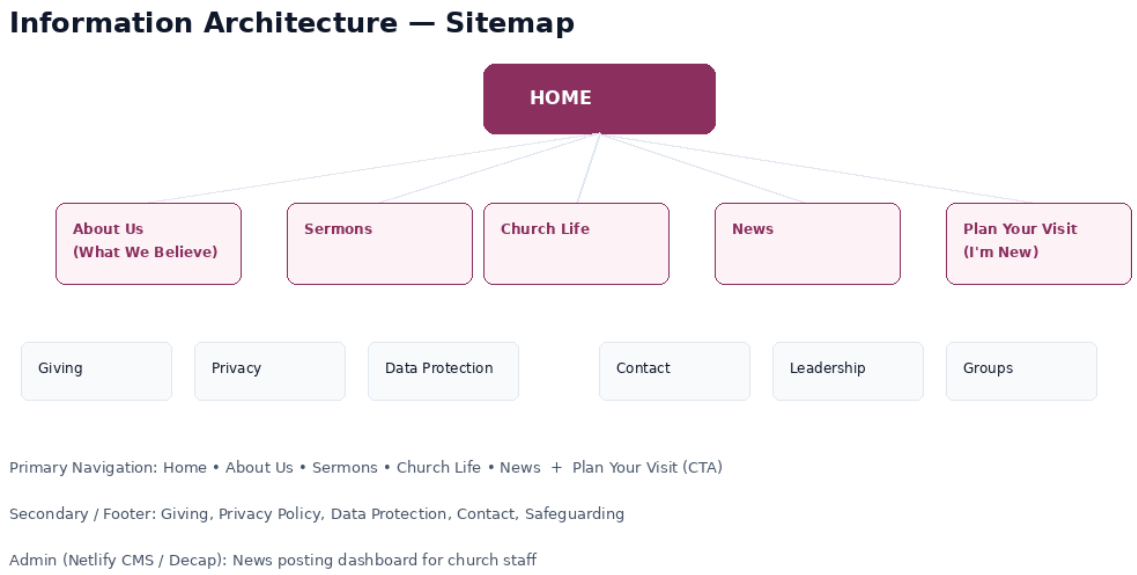

Figure 2 — Site map and primary navigation structure

Primary Pages

Page	Purpose
Home	Hero invitation, service times, quick cards, video intro, leadership teaser, groups overview
About Us / What We Believe	FIEC doctrinal basis, beliefs overview, leadership team
Sermons	Latest series, archive links to Logos Sermons and Spotify, scripture emphasis
Church Life	Homegroups, youth, kids, men’s & women’s groups, events
News	Church announcements and updates (CMS-powered)
Plan Your Visit (I’m New)	Newcomer guide: dress code, parking, kids provision, what to expect, contact

05 — User Personas

Three primary personas shaped design decisions. Each represents a distinct level of familiarity with the church and a different set of needs.

1. Sarah — The Curious Newcomer

Age 28–40. Recently moved to Milton Keynes or exploring faith. Key questions: What time? Where do I park? Is there something for my children? What do people wear? Will anyone speak to me? Design response: prominent “Plan Your Visit” CTA, clear service-time card, dress-code reassurance, kids information, and an obvious contact path.

2. David — The Regular / Parent

Age 30–50. Already attending or considering joining a group. Needs fast access to sermons, group schedules and news. Design response: persistent navigation to Sermons and Church Life, scannable group lists, and a news section that stays current.

3. Church Staff / Admin

Needs to publish news and announcements without developer involvement. Design response: Netlify CMS / Decap CMS admin dashboard for news posts, keeping the public front-end simple and predominantly static.

06 — Low-Fidelity Wireframes

Wireframes reverse-engineered from the current live redesign. Emphasis is on content hierarchy, major blocks and primary user actions rather than visual finish.

Figure 3 — Home page wireframe (Desktop)

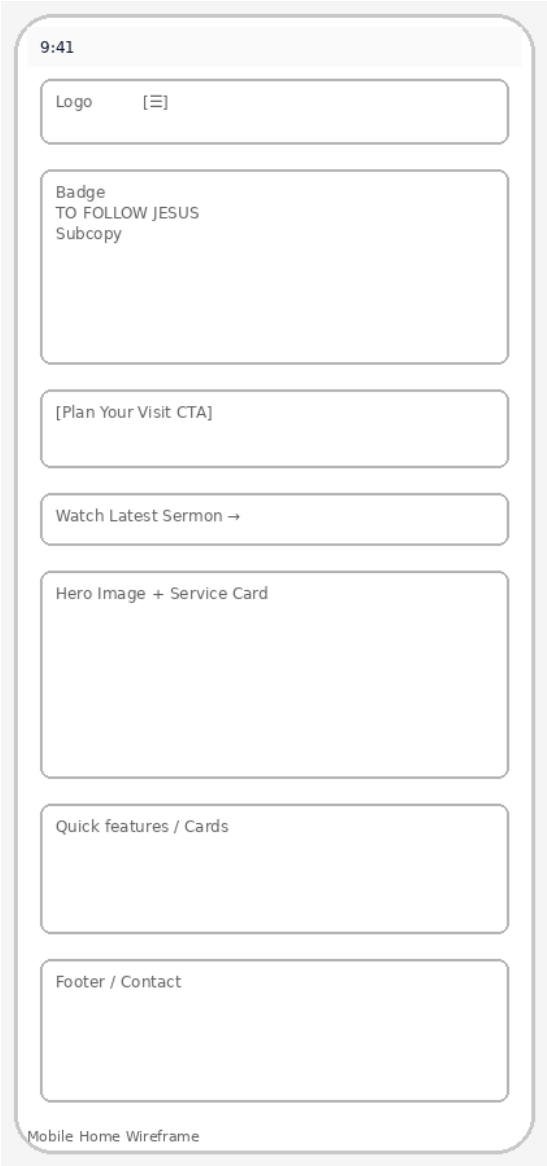

Figure 4 — Home page wireframe (Mobile)

Figure 5 — Plan Your Visit / I'm New wireframe (Desktop)

07 — High-Fidelity Design (Current Live State)

The redesign is substantially complete. The notes below reflect the live implementation at the time of documentation (October 2026). For portfolio or presentation use, capture fresh browser screenshots of the live site.

Key Screens Implemented

- **Home** — Hero with dual CTA (Plan Your Visit + Watch Latest Sermon), service-time card overlaid on photography, quick-info cards, video section, groups and leadership.
- **Plan Your Visit (I'm New)** — Step-by-step newcomer journey, embedded video, location/parking cards, FAQ-style content, kids systems, beliefs link.
- **Sermons** — Scripture-led header, latest-series emphasis, external links to Logos Sermons and Spotify.
- **Church Life** — Overview of homegroups, youth, kids, men's and women's groups.
- **News** — CMS-driven list of church announcements.
- **Supporting pages** — What We Believe, Giving, Privacy, Data Protection.

Observed Design Strengths

Clear visual hierarchy, consistent application of the primary colour to actions, excellent mobile adaptation (sticky elements and large touch targets), and a strong prioritisation of the newcomer journey. The floating Contact Us control provides a persistent conversion path across the site.

08 — Project Timeline (Gantt Chart)

Approximate project timeline. At the time of writing the site is in late development / content / QA and is close to launch readiness.

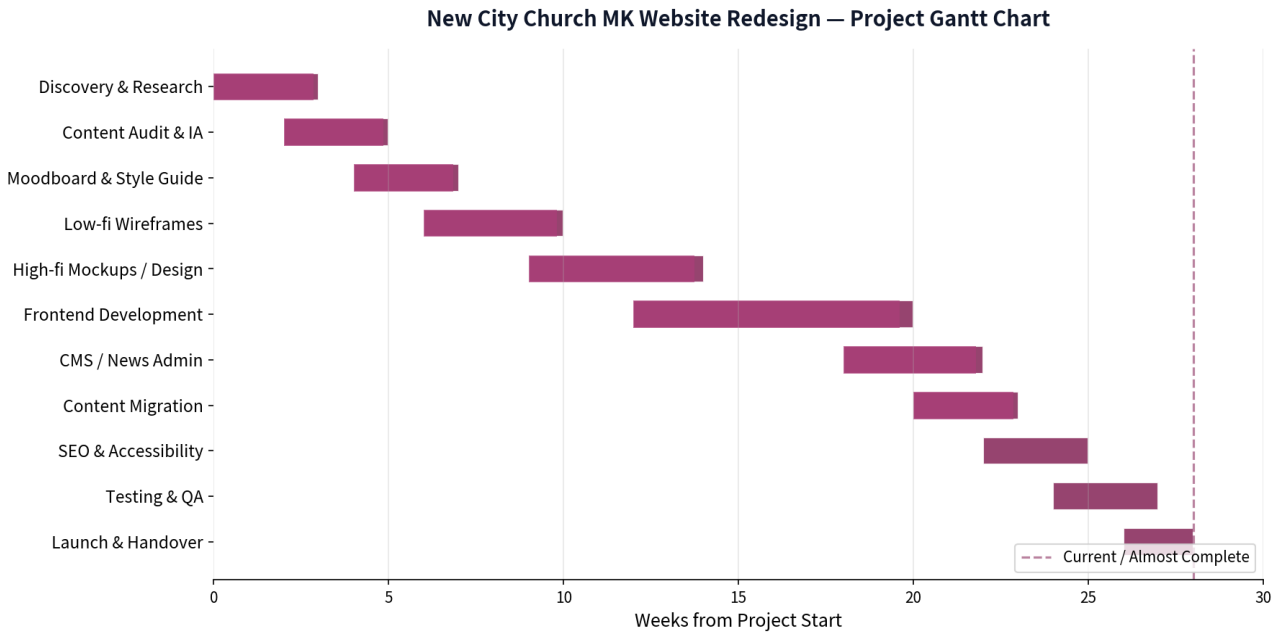

Figure 6 — Project Gantt chart (weeks from project start)

Typical remaining work includes final content review, accessibility and performance audits, CMS training for staff, and domain cut-over planning from the legacy Wix site.

09 — SEO Strategy

Primary Keywords & Intent

Keyword / Phrase	Intent	Target Page
church Milton Keynes	Local discovery	Home / About
evangelical church MK / Oakgrove	Local + denominational	Home / About
new to church Milton Keynes	Newcomer	Plan Your Visit
Sunday service times Milton Keynes	Practical information	Home + I’m New
sermons New City Church	Returning / regular	Sermons
kids church / youth Milton Keynes	Family	Church Life / I’m New

On-Page Recommendations

- Unique, descriptive title tags and meta descriptions on every page (include “Milton Keynes” and “New City Church”).
- Clear H1 that matches primary search intent (already strong on most pages).
- Structured data: LocalBusiness / Church schema with address, service times and geo-coordinates.
- Meaningful image alt text describing people, location or activity.
- Internal linking from Home and I’m New into Sermons, Church Life and Contact.
- Optimise Core Web Vitals: compress hero images, lazy-load below-fold media, keep CSS lean.
- Submit XML sitemap and robots.txt to Google Search Console and Bing Webmaster Tools.
- Fully optimise the Google Business Profile and link it to the new domain.

Technical Notes

The site is static HTML + CSS with a CMS for news — excellent for performance and crawlability. Ensure canonical URLs, HTTPS and mobile-friendliness (already strong). Add Open Graph tags for social sharing of sermons and news posts.

10 — Accessibility Notes

The redesign already demonstrates solid accessibility foundations. The checklist below should be completed before final launch.

Already Strong

- Semantic HTML structure and clear heading hierarchy.
- High colour contrast between text and backgrounds.
- Large touch targets on mobile (especially CTAs and navigation).
- Visible focus states and keyboard-friendly navigation.
- No horizontal scrolling on mobile viewports.

Recommended Pre-Launch Checks

- Run axe DevTools or Lighthouse accessibility audits on all key pages.
- Confirm every image has meaningful alt text (or empty alt for pure decoration).
- Ensure form fields (contact) have associated labels and clear error messaging.
- Test with VoiceOver / TalkBack and keyboard-only navigation.
- Provide text alternatives or transcripts for key video content where feasible.
- Verify the floating Contact button does not obscure content or create focus traps.

11 — Recommendations & Next Steps

Immediate Priorities

1. Final content review with church leadership (beliefs, leadership bios, service details).
2. Complete any remaining pages or polish (Giving, full leadership grid, etc.).
3. CMS training session for the people who will publish news.
4. Full accessibility and performance audit followed by fixes.
5. Set up analytics (GA4 or privacy-friendly alternative) and Search Console.
6. Domain cut-over planning (DNS, redirects from old Wix URLs if required).
7. Launch checklist and soft-launch to a small group of regulars for feedback.

Post-Launch Enhancements

- Searchable / filterable sermon archive (if not already covered by the Logos embed).
- Events calendar integration.
- Improved online-giving flow and clearer tracking.
- Multilingual considerations if the congregation becomes more diverse.
- Periodic usability testing with actual newcomers.

This documentation was produced by reverse-engineering the live redesign at https://marquis09.github.io/Newcity/ in October 2026. It is intended to stand in place of the original Figma source files and to serve as the authoritative record of the design system, structure and strategy for the New City Church MK website.
